1. Introduction

The 2014 to 2020 European Structural and Investment Funds bring the European Regional Development Fund, European Social Fund and part of the European Agricultural Fund for Rural Development together into a single European Union Structural and Investment Funds Growth Programme for England supporting the key growth priorities of innovation, research and development, support for Small and Medium sized Enterprises, low carbon, skills, employment, and social inclusion.

The Funds are managed by the Department for Communities and Local Government for European Regional Development Fund, Department for Work and Pensions for European Social Fund and the Department for Environment Food and Rural Affairs for European Agricultural Fund for Rural Development. These Departments are the Managing Authorities for each Fund. In London, the Greater London Authority acts as an Intermediate Body for the European Regional Development Fund and European Social Fund programmes. Unless stated otherwise, the term “Managing Authority” will apply to all these organisations. The Managing Authorities work closely with local partners who provide:

- Practical advice and information to the Managing Authorities to assist in the preparation of local plans that contribute towards Operational Programme priorities and targets;
- Local intelligence to the Managing Authorities in the development of project calls (decided by the Managing Authorities) that reflect Operational Programme and local development needs as well as match funding opportunities; and
- Advice on local economic growth conditions and opportunities within the context of the Operational Programme and the local European Structural Investment Fund Strategy to aid the Managing Authority’s assessments at outline and full application stage.

This call is issued by the Department for Communities and Local Government and invites Outline Applications in respect of the European Regional Development Fund for England 2014 to 2020.

2. Call Context

On behalf of the national Growth Programme Board, the Department for Communities and Local Government (the Managing Authority) invites applications seeking European Regional Development Fund support under:

Priority Axis 1 Promoting Research and Innovation

Investment Priorities:

- 1a** enhancing research and innovation infrastructure and capacities to develop research and innovation excellence, and promoting centres of competence, in particular those of European interest.

- 1b** promoting business investment in research and innovation;
 - developing links and synergies between enterprises, research and development centres and the Higher Education sector, in particular promoting investment in product and service development, technology transfer, social innovation, eco-innovation, public service applications, demand stimulation, networking, clusters and open innovation through smart specialisation;
 - and supporting technological and applied research, pilot lines, early product validation actions, advance manufacturing capabilities and first production, in particular in key enabling technologies and diffusion of general purpose technologies.

The **European Regional Development Fund Operational Programme for England 2014 to 2020** sets out how the European Regional Development Fund will focus on investment to support economic growth and job creation. **Priority Axis 1** of the Operational Programme aims to improve how Small and Medium Sized Enterprises commercialise research and how they collaborate with research institutions.

Any application for funding will be required to clearly demonstrate that it meets the requirement of, and makes a meaningful contribution to, the delivery of the relevant Priority Axis of the [European Regional Development Fund Operational Programme](#).

In addition, applications will be expected to meet identified local development need, as expressed in the scope of this call and as set out in the [Leicester & Leicestershire Enterprise Partnership](#) European Structural and Investment Funds Strategy.

Applicants are advised to familiarise themselves with the detail of the Operational Programme, local European Structural and Investment Funds Strategy and the relevant documentation listed in sections 5 through to 8 **prior to** submitting an Outline Application.

3. Scope of the Call

3.1. Scope

This call invites Outline Applications which support the delivery of **Priority Axis 1** of the European Regional Development Fund Operational Programme and responds to the local development need set out in the [Leicester & Leicestershire Enterprise Partnership Local Enterprise Partnership European Structural and Investment Funds Strategy](#).

Indicative Fund Allocation:	<p>Indicatively, through this call the Managing Authority expects to allocate up to £8,000,000</p> <p>The Managing Authority reserves the right to increase or decrease the indicative allocation, or support more or fewer projects subject to the volume and quality of proposals received.</p> <p>There is no indicative allocation of European Regional Development Fund funding between capital and revenue activity, both capital and revenue is eligible dependent on the nature of activities/Investment Priorities set out in the call.</p>
Minimum application level	<p>European Regional Development Fund investment is intended to make a significant impact on local growth. Applications are expected to demonstrate appropriate scale and impact. The Managing Authority does not intend to allocate less than £500,000 European Regional Development Fund to any single project. Consequently projects with a total value of less than £1,000,000 will not be supported under this call.</p>
Duration of project approvals	<p>Projects should be for a maximum of three years, however the Managing Authority reserves the right to vary the maximum duration in exceptional circumstances.</p>
Geographical Scope	<p>All interventions are confined to activity and beneficiaries within England.</p> <p>Revenue projects should predominantly support businesses based within Leicester & Leicestershire Local Enterprise Partnership area.</p>
Specific call requirements	<p>Due to the nature of the PA1 Call, the LLEP will allocate up to a maximum of £4,000,000 under Investment Priority-1a, together with a further £4,000,000 under Investment Priority-1b</p>

Call Deadlines	For this specific call, applications will be assessed after the close of the single deadline. Applications received after the published call close date will not be considered. All applications will be assessed following closure of the call.
-----------------------	--

3.2. Local Development Need

Projects must deliver activity which directly contributes to the objectives of Priority Axis 1 of the Operational Programme, one or more of the relevant Investment Priorities and meet the **local development need** expressed in the table below.

LOCAL DEVELOPMENT NEED
<p>Local Economic Context :</p> <p>For the LLEP area, we are keen to commission activity to support the delivery of actions and recommendations outlined within our ESIF Strategy, Sector Growth Plans and Strategic Economic Plan (SEP).</p> <p>Priority focal areas include, but are not restricted to, our priority sectors being:</p> <ul style="list-style-type: none"> • Food & Drink Manufacturing • Textile Manufacturing • Creative Industries • Low Carbon • Logistics & Distribution • Advanced Manufacturing & Engineering • Tourism & Hospitality • Professional & Financial Services <p>Innovation is strongly emphasised in the EU’s Cohesion Strategy for 2014-2020, underpinning the objective for nations and regions to achieve a sustainable, innovation-led recovery. Yet the UK continues to lag behind the lead countries on traditional measures such as investment in research and development as a percentage of GDP.</p> <p>The most often cited barriers by businesses to doing more innovation are related to perceived costs associated with R & D. In the LLEP area, a high proportion of businesses (71%) say that they make no financial investment in Research & Development (R & D). This proportion is higher still amongst micro SMEs of whom 78% make no investment at all in R&D. Within our area only 17% of businesses have worked with a university within the last 3 years. There also appears to be a mismatch between the innovative output of the universities in the LLEP area and the business formation of the local region. As a result, the LLEP area has a lower proportion of knowledge-intensive employment than other neighbouring regions.</p> <p>High growth firms only account for 7% of the business stock in the UK overall yet</p>

they are responsible for around 50% of all new jobs generated. The one characteristic these firms share is that they are innovative and have the following common needs:

- Access to finance for growth;
- A skilled workforce;
- Infrastructure that enables the flow of ideas (i.e. physical and electronic communications infrastructure – including fast broadband connectivity); and
- A demand for innovative products and processes, stimulated through supply-chain and public sector activities.

The Witty Report (2013) stated that universities have an extraordinary potential to enhance economic growth and recommends that universities be put at the heart of the LEPs thinking and decision-making as potential “arrow heads” of innovative activity.

Leicester University and Loughborough University feature strongly in areas identified by Witty and this chimes with the sectors identified in our [Strategic Economic Plan](#) – satellites / space, aeronautical engineering and Earth Sciences as well as medicine & pharmacology. Other emerging nationally significant capabilities include data mining.

There is a cluster of world class expertise in medicine at Leicester University (cardiovascular, respiratory, diabetes and cancer), regenerative medicine at Loughborough University and other key areas of expertise such as textiles and manufacturing together with the Centre for Assisted Living / SMART Cities initiative at De Montfort University. Historically, whilst this excellence has been recognised, it has been viewed as activity that leads to better delivery of health care and employment in the public sector and not necessarily supporting an economic growth agenda of rebalancing the local economy.

Universities / Research Institutions in the LLEP area have a long history of collaboration such as through the M6 Group and are well placed to work together.

The LLEP area currently lacks scale in knowledge-intensive businesses and graduate level jobs required to make a real difference to the economy, yet for existing businesses the overall low level of skills in the population and challenges in filling technician-level jobs can be an inhibitor to growth. This perpetuates a cycle, where companies may find it difficult to innovate (or to implement new or improved processes) due to a lack of workforce skills, whilst individuals may have limited incentive to invest in their skill development. Furthermore, highly skilled individuals are incentivised to migrate away from the local area or commute to work elsewhere. Therefore we see potential opportunities / linkages not only with other ERDF initiatives but also with our ESF Skills (TO-10) Programme.

Our FE Colleges also have a critical role to play in this area through their established dialogue with local employers and also their links to universities. Across the economy there has been a decline in the proportion of semi- or intermediate-skilled

jobs associated with qualifications at Level 2 (the skilled trades and administrative & secretarial occupations) in favour of 'technician-level' jobs that are associated with a Level 3 or higher (associate professional occupations in both production and service sectors). This indicates that support for the provision of both intermediate and higher level skills should be a priority to develop innovation.

Local Priorities:

Proposals should demonstrate alignment with local development need and priorities including:

1. The LLEP Business Gateway is the Growth Hub for Leicester and Leicestershire. The Business Gateway brings together all business support provision available within the LLEP area into one place; supporting business to know what support is available, and connecting them to service providers who can meet their growth needs. Each service provider will be required to demonstrate their commitment to working within the scope of the LLEP Business Gateway Partnership Protocols. [Click here](#) to access.

Investment Priority -1a:

1. The LLEP are keen to support the development of physical and digital assets that are focused on areas of comparative advantage to provide opportunities for 'smart specialisation'. These areas are identified within the ESIF Strategy and include: satellites/space, aeronautical engineering, earth sciences, medicine & pharmacology, creative and digital and data mining. The LLEP also features in three of the four clusters of activity that East Midlands Council identified in their report that explored opportunities for collaboration that could deliver strategic large scale initiatives across the East Midlands. The three clusters of activity that the LLEP featured in were: Transport Equipment, Energy Generation & Supply and Food Technology. Assets that support growth through innovation in our 8 priority sectors are also encouraged
2. It is vital that assets produced are not only utilised to further the comparative strengths of the research base but are also utilised to further the development of local business and growth in the local economy, via not only direct use by local businesses and creating synergies and networking opportunities within local supply chains for businesses utilising the assets
3. Alongside this call, a call under Priority Axis 3 Investment Priority 3a for incubation and grow-on space has been released, creating workspace and adding to our network of enterprise centres across the LLEP area. Research and innovation assets created through this Priority Axis 1 call are required to demonstrate how they will create synergies and complement the existing network of incubation and enterprise centres across the LLEP area
4. We are keen to support activities and proposals which would increase the provision and quality of specialist infrastructure, facilities and assets linked to research, development and innovation within businesses
5. Supported activity would provide businesses with access to infrastructure, test facilities, shared use research laboratories etc. to conduct various forms of product and process innovation, as well as assistance in using the facilities.

However, providers will need to be mindful that this activity does not duplicate future activity under the Low Carbon strand Priority Axis 4 Investment Priority 4f to be launched later this year.

Investment Priority -1b:

6. We envisage activities under this investment priority (1b) linking to the capital projects under investment priority 1a to deliver support where needed and / or to SMEs in all sectors to promote collaboration with existing and new demonstrator facilities and smart specialisation Networks to exploit the research and areas of excellence associated with the LLEP knowledge base, growth sectors and business strengths and aid innovation, to include;
 - I. Raising awareness with SMEs of the benefits of research and innovation, to create and drive demand for innovation support services in the form of research and innovation activities, particularly in priority sector areas.
 - II. Development of enterprise, innovation and technology hubs, centres of excellence, manufacturing clusters, test facilities, pilot lines and advance manufacturing collaborations.
 - III. Support for smart specialisation, collaborative and contract research and development including initiatives stimulating and facilitating productive innovation partnerships, building collaborations with R & D /Innovation providers with a focus on achieving business growth, in particular commercialisation and bringing new products to market.
 - IV. Support for the commercialisation of new products and business processes and initiative particularly targeted to and innovation in the LLEP key growth sectors.
 - V. Knowledge transfer opportunities including supported graduate placements amongst identified areas of research strength and across growth sectors. Schemes stimulating / enabling graduate start-up and spin out from universities, colleges and research institutions.

7. A grant scheme would be welcomed under Investment Priority-1b. However, activities above must not duplicate those business support activities available under our small scale revenue grant scheme which will be funded under Priority Axis 3 and will provide grants up to £25k ERDF with an equivalent contribution from the SME (i.e. £50k total project costs) to help SMEs innovate and take up innovation expertise from specialist providers which could be from any specialist institution (international, national or local, public and private). Any grant scheme coming forward under Priority Axis 1 Investment Priority 1b will pay for specific innovation support from experts focused on delivery of a specific business project which is expected to lead to business growth, in particular commercialisation and bringing new products to market. Grants must be business-led, with the source of the expertise required to help deliver the project identified by the business. In addition, the focus of the grant must be on converting R & D into new products.

Please note that financial instrument projects (i.e. where the project involves the provision of loans or risk finance investment) are excluded from this call.

3.3. Operational Programme Investment Priorities

Applications must specify the activities to be delivered and are expected to directly contribute to **one or more** of the following Investment Priorities:

Investment Priority	1a – Enhancing research and innovation infrastructure and capacities to develop research and innovation excellence, and promoting centres of competence, in particular those of European interest.
Specific Objectives	Enhancing research and innovation (R&I) infrastructure and capacities to develop R&I excellence, and promoting centres of competence, in particular those of European interest.
Indicative Actions	<p>The purpose of support under this investment priority will be to build or enhance infrastructure that in due course will contribute to the greater commercialisation of products, services and processes.</p> <p>Under this investment priority indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Specialist infrastructure/facilities/centres linked to smart specialisation including enhancements to science parks and to improve access to these facilities through digital and physical links. • Investment in the development and upgrading of innovation space, with capability to serve as a platform or host for innovation and innovative relationships. • Improved incubation space to enable research and development and innovation. • Shared use research laboratories and facilities, particularly targeted at the Great Eight technologies as set out in “Smart Specialisation in England”

	<ul style="list-style-type: none"> • Development of enterprise, innovation and technology hubs and centres of excellence, in line with the approach set out in “Smart Specialisation in England”. • Development and upgrading of appropriate test facilities and deployment infrastructure. <p>In all cases, actions will include provision of appropriate equipment and staff resources.</p> <p>Activity under this specific objective will also underpin activity under the other specific objectives within this priority axis, by enabling investment in infrastructure, facilities and equipment. This will contribute to the wider goal of improving the commercialisation of new products, services and processes by small and medium enterprises.</p>
--	---

<p>Investment Priority</p>	<p>1b – Promoting business investment in research and innovation;</p> <ul style="list-style-type: none"> • Developing links and synergies between enterprises, research and development centres and the Higher Education sector, in particular promoting investment in product and service development, technology transfer, social innovation, eco-innovation, public service applications, demand stimulation, networking, clusters and open innovation through smart specialisation; • Supporting technological and applied research, pilot lines, early product validation actions, advance manufacturing capabilities and first production, in particular in key enabling technologies and diffusion of general purpose technologies.
<p>Specific Objectives</p>	<ul style="list-style-type: none"> • Increase investment in research and innovation by Small and Medium Sized Enterprises in sectors and technologies identified through smart specialisation. • Increase the number of small and medium sized enterprises engaged in knowledge exchange, collaborative and contract research and innovation with

	<p>research institutions, public institutions or large enterprises in order to help them bring new products and processes to market.</p>
<p>Indicative Actions</p>	<p>Under this investment priority indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Support for smart specialisation collaborative and contract research and development including initiatives stimulating and facilitating productive innovation partnerships • Support for the commercialisation of new products and business processes and initiatives, particularly targeted to aid innovation in the Great Eight technologies as set out in “Smart Specialisation in England” • Collaborative and contract research and development programmes • Applied research programmes, particularly targeted at sectors and technologies set out in smart specialisation in England • Innovation vouchers for Small and Medium Sized Enterprises • Innovation support programmes for product design and development and systems integration • Initiatives simulating the demand for new or improved services, processes and products including business-led and public procurement programmes • Schemes providing practical, financial and material support for the innovation process within businesses • Schemes stimulating and enabling graduate start-up and spin out from universities, colleges and research institutions • Technology support programmes and demonstrator projects and programmes for current and future technologies • Knowledge transfer programmes, particularly linked to

	<p>priority growth sectors and the technologies set out in Smart Specialisation in England</p> <ul style="list-style-type: none"> • Support to engage more businesses in knowledge transfer and innovation, develop links to wider Higher Education institutions and research institutions and demonstrate the benefits of working with knowledge base partners • Support for innovation ecosystems including business-led networks and open innovation ecosystems that reduce the complexity of interaction within and between organisations • Activities promoting a smart specialisation approach and initiatives that develop the supportive environment for innovation in Small and Medium Sized Enterprises including the promotion of networks and industry groups in key sectors • Grants to support businesses to develop prototypes and prove concepts to assist tech start-ups with early stage development work and the exploitation of intellectual property. • Grants to promote the use of social innovation to bring new products and processes to the market. <p>The focus of activity under this priority axis is improving commercialisation of new or enhanced products or services by Small and Medium Sized Enterprises, whether through increased investment or better collaborations, but this requires the involvement of a much wider group including larger firms in cooperation with their supply chains and other Small and Medium Sized Enterprises, Higher Education institutions, public sector institutions and research centres, Catapult Centres and other centres of excellence.</p> <p>Projects under this investment priority, including pilot or demonstrator activity, may include capital spend where this is integral to their delivery. This may include enhancements to premises or new build, equipment and facilities. Where new premises are to be built, then there must be clear evidence that demand is not met by existing supply.</p>
--	--

4. Required Outputs under this Call

Projects must deliver against the Priority Axis 1 outputs and results of the European Regional Development Fund 2014 to 2020 Operational Programme. For projects coming forward under this call the expected outputs and results are:

ID	Output Indicator
C1	Number of enterprises receiving support
C2	Number of enterprises receiving grants
C4	Number of enterprises receiving non-financial support
C5	Number of new enterprises supported
C6	Private investment matching public support to enterprises (grants)
C8	Employment increase in supported enterprises
C25	Number of researchers working in improved research facilities
C26	Number of enterprises cooperating with research institutions
C28	Number of enterprises supported to introduce new to the market products
C29	Number of enterprises supported to introduce new to the firm products
P1	Number of researchers working in improved research or innovation facilities
P2	Public or commercial buildings built or renovated

Applicants will need to demonstrate how the eligible activity, funded by the European Regional Development Fund, will achieve the deliverables committed to within the proposal. The application should clearly state the methodology used to determine the levels of outputs proposed.

All operations will be required to report regularly on progress toward achievement of targets. This will need to include both quantitative and qualitative data relevant to the appropriate geographical areas. Applicants will need to explain how they will collect and record this information to maintain a fully evidenced audit trail. It should be noted that if an operation fails to deliver contracted deliverables, a performance penalty may apply.

5. Application Process & Prioritisation Methodology

There are two stages to the European Regional Development Fund application process;

- (i) Outline Application and, if successful
- (ii) Full Application.

Acceptance of an Outline Application to progress to full application stage does not in any way indicate or constitute an offer of European Regional Development Fund grant.

Applicants must fully complete the [Outline Application](#) which will be assessed by the Managing Authority against the national [Selection Criteria](#).

Outline Applications will be assessed in two stages, Gateway assessment and Core assessment.

Gateway assessment considers:

- applicant eligibility;
- activity and expenditure eligibility; and
- fit with the National Operational Programme and the local development need set out in section 2.

Proposals that fail the Gateway assessment will be rejected. Proposals which pass the Gateway assessment will then be assessed against the Core assessment criteria:

- Strategic Fit
- Value for money
- Management and control
- Deliverability
- Compliance
 - Procurement
 - State Aid
 - Publicity requirements
- Cross cutting themes
 - Environmental sustainability
 - Equal Opportunities

Having assessed projects against these criteria the relevant Local Economic Partnership area European Structural and Investment Fund Sub-Committee will advise the Managing Authority on the contribution to local economic growth

conditions and opportunities within the context of the Operational Programme and local European Structural and Investment Fund Strategy to aid the Managing Authority's assessments (at outline and full application stage).

Please note that the Managing Authority's decision is final and there are no appeals. If you wish to complain about the calls and application process, please follow the procedure set out at <https://www.gov.uk/government/organisations/department-for-communities-and-local-government/about/complaints-procedure>

6. General Information

6.1. National Eligibility Rules

When developing an application, Applicants must refer to the [National Eligibility Rules](#) setting out the requirements of the 2014-2020 European Regional Development Fund Programme. It is the responsibility of the Applicant to ensure that the Rules are adhered to both at application stage and following approval. Failure to do so can lead to financial penalties leading to recovery of up to 100% of grant. Applicants are strongly advised to seek specialist advice if in doubt on any requirement.

European Regional Development Fund eligibility rules apply to **all** project spend within the eligible costs, including match funding.

The European Regional Development Fund is governed by European regulations and national rules. Applicants are advised to familiarise themselves with the relevant documentation, (Section 8 Key Document refers) prior to submitting an Outline Application. If successful, Applicants will enter into a Funding Agreement and must abide by the standard terms and conditions contained therein. Applicants are therefore strongly advised to read these terms and conditions to ensure that they are able to enter into such an agreement prior to responding to the call. Once a Funding Agreement has been issued it should be signed and returned within 30 days, unless otherwise agreed with the Managing Authority.

6.2. Eligible Applicants

Section 4 of the [National Eligibility Rules](#) sets out who is eligible to apply.

Applicants must be legally constituted at the point of signing a Funding Agreement. If the application is approved the Applicant organisation will enter into a legally binding Funding Agreement and therefore will carry the liability for ensuring that the terms and conditions of the Funding Agreement are met.

If there is more than one organisation applying for the funds, a lead organisation must be selected to become the Applicant with the remaining organisation(s) acting as Delivery Partner(s). In this situation the Applicant would be responsible and liable for the Delivery Partner(s) and ensuring the project is operating compliantly.

During the application process the Managing Authority will consider the Applicant's track record, both positive and negative. If the Applicant has been involved in the delivery of previous European grants and any irregularities have been identified, the Managing Authority will expect to see how and what steps have been taken to ensure that the risk of further irregularities in the future is mitigated. It is acknowledged that some organisations will be new to European Structural and Investment Funds funding and will not have a track record.

6.3. Contribution Rate & Match Funding

European Regional Development Fund is normally expected to intervene where no other funding can be obtained (i.e. the funder of last resort). The level of European Regional Development Fund awarded will be the minimum in order for the project to proceed.

The maximum Contribution Rate is 50% of the total eligible project costs subject to State Aid regulations.

The remaining 50% or more must come from other eligible sources as specified under section 6 of the National Eligibility Rules. Applicants will need to demonstrate that they have eligible match funding in place for the balance of costs. Other European Union funds cannot be used as a source of match funding.

European Regional Development Fund investment is limited by State Aid regulations and where the award of European Regional Development Fund would constitute State Aid the European Regional Development Fund grant rate may fall below the 50% maximum.

European Regional Development Fund is paid quarterly in arrears and expenditure must be defrayed prior to the submission of any Grant claims. Applicants may be asked to demonstrate how they are able to cash flow the operation.

6.4. Project Timescales

European Regional Development Fund funding will normally be approved for three years, however the Managing Authority reserves the right to extend the contract term in exceptional circumstances.

Projects approved through this call are expected to:

- Submit a detailed and complete full application within three months of formal selection at outline stage. Projects which fail to meet this deadline may be deselected,
- Commence delivery (defraying European Regional Development Fund eligible costs) within three months of formal approval. Projects which fail to meet this deadline may be deselected, and
- Be completed by June 2023.

6.5. Capital Projects

Applicants seeking European Regional Development Fund to support a capital project (i.e. land and/or property) will need to meet Building Research Establishment Environmental Assessment Method or Civil Engineering Environmental Quality Assessment 'Excellent' for new builds and 'Very Good' for refurbishments. Applicants will need to provide evidence of how they will achieve the rating required (unless otherwise agreed with the Managing Authority).

Applicants will need to demonstrate that they have the rights and permissions to undertake the project and must provide:

- Proof of current interest in the land and/or property, which includes evidence of the freehold ownership or any lease arrangements that may be in place; and
- Evidence of the approval of any planning permission, or in certain circumstances a clear statement on the process for securing such consents and any risks to the project.

Royal Institute of British Architects Stage D costs must be supplied with the Full Application and be certified by an independent Quantity Surveyor and Land/Property contributions certified by a Real Estate Valuation expert who are current and chartered members of the Royal Institute of Chartered Surveyors/ Chartered Institute of Builders or equivalent body.

Successful Applicants will be required to provide security to the Managing Authority in the form of a Legal Charge and/or Deed of Covenant over the land and/or property. Applicants will be responsible for registering the charge at their own cost.

6.6. Cross Cutting Themes/Horizontal Principles

All applications received under this call should demonstrate how the Cross Cutting Themes have been addressed in the project design and development. Cross Cutting Themes for European Regional Development Fund are 'equality and anti-discrimination' and 'sustainable development'. Further information is available in the [European Regional Development Fund Operational Programme](#).

6.7. Additionality, Duplication and Displacement

Additionality is a core principle of European Regional Development Funding. Applicants must be able to demonstrate that the activity paid for out of European Regional Development Funding adds value to new or existing activity. Projects need to demonstrate that without the support of European Regional Development Funding the activity would not have taken place.

European Regional Development Funding cannot support activities that duplicate existing provision/services within the region.

Applications need to identify and evidence the beneficiaries will use the service and demonstrate that the project does not displace other activity available in the market place.

6.8. State Aid & Revenue Generation

Applicants are required, in the Outline Application, to provide a view on how their proposal complies with State Aid law. Applicants must ensure that projects comply with the law on State Aid.¹ Grant funding to any economic undertaking which is State Aid can only be awarded if it is compatible aid, in that it complies with the terms of a notified scheme or is covered by the De Minimis Regulation. Guidance for Grant Recipients, explaining more about [State Aid](#), is available; it is important that Applicants take responsibility for understanding the importance of the State Aid rules and securing their full compliance with them throughout the project, if it is selected into the Programme.

The Managing Authority is not able to give legal advice on State Aid. It is the responsibility of the Applicant to ensure that the operation is State Aid compliant.

Where the Applicant does not perceive that there is any State Aid, it should state whether or not it considers Articles 61 and 65(8) of regulation 1303/2013 to apply. Article 61 refers to monitoring revenues generated after completion of the project, and Article 65(8) how to deal with differences in the forecast and actual revenues at the end of the operation. This revenue should be taken into account in calculating eligible expenditure. The details of this will be tested at the full application stage.

¹ Article 107(1) of the Treaty on the Functioning of the European Union provides that: "Save as otherwise provided in the Treaties, any aid granted by a Member State or through state resources in any form whatsoever which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between Member States, be incompatible with the internal market."

6.9. Funding Agreement

The Funding Agreement is a standard, non-negotiable and legally binding document. Any successful Applicant will be subject to the terms and conditions contained within this agreement. Applicants are strongly advised to seek relevant advice to ensure that they would be able to enter into and abide by the terms of the Funding Agreement.

Applicants are advised that additional provisions and securities may be included within the Funding Agreement to protect the investment. Detailed advice will be given if appropriate at the Full Application stage.

Failure to meet any of the conditions of the Funding Agreement or the commitments within the application will result in claw back of the Grant (which may include interest).

6.10. Procurement

All costs claimed by the Applicant (Grant Recipient and/or Delivery Partner(s)) must be recovered on an actual cost basis. Other costs must be procured in line with National (including [Public Procurement Regulation 2015](#)) and European Union regulations. Procurement will be subject to audit and verification and any irregularity will result in financial penalty of up to 100% of the grant paid. Robust and transparent procurement is required to ensure that Grant Recipients:

- Consider value for money;
- Maximise efficient use of public money; and
- Maintain competitiveness and fairness across the European Union.

It is **strongly recommended** that Applicants seek and follow legal advice in respect of procurement requirements. Procurement irregularities remain the most substantive cause of error and clawback of grant.

7. Support

Please note that this is a competitive call and to preserve impartiality we are unable to enter into correspondence with applicants over their Outline Application. Details of where guidance can be found are contained throughout this calls document. In exceptional circumstances, if there are issues with accessing this guidance, please contact: EM.ERDFENQUIRIES@communities.gsi.gov.uk.

8. Key Documents

- European Regional Development Fund Operational Programme;
- Outline Application Form;
- Outline Application Form Guidance;
- Local Enterprise Partnership area's European Structural and Investment Funds Strategy;
- Eligibility Guidance;
- Target Definitions; and
- Funding Agreement (Revenue and/or Capital).

9. Document Checklist

Incomplete applications will be rejected. Please ensure the following information (documents) are submitted.

Outline Stage:

- Fully completed Outline Application;
- Financial Tables;
- Outputs, Results and Indicators Tables.

10. Document Submission

Completed Outline Applications must be submitted via **email** to the address in Section 7.

Outline Application forms not received by the deadline will not be assessed. Outline Applications which are not fully completed will be excluded.

For this call applications will normally be required to **commence delivery/activity within three months** of the award of Funding Agreement.

Any changes related to the deadline for the submission of the Outline Application form will be notified on the [European Growth Funding](#) website pages.
