1. Introduction

The 2014 to 2020 European Structural and Investment Funds bring the European Regional Development Fund, European Social Fund and part of the European Agricultural Fund for Rural Development together into a single European Union Structural and Investment Funds Growth Programme for England supporting the key growth priorities of innovation, research and development, support for Small and Medium Sized Enterprises, low carbon, skills, employment, and social inclusion.

The Funds are managed by the Department for Communities and Local Government for European Regional Development Fund, Department for Work and Pensions for European Social Fund and the Department for Environment, Food and Rural Affairs for European Agricultural Fund for Rural Development. These Departments are the Managing Authorities for each Fund. In London, the Greater London Authority acts as an Intermediate Body for the European Regional Development Fund and European Social Fund programmes. In some other areas, Intermediate Bodies are being designated by the Department for Communities and Local Government and the Department for Work and Pensions to perform certain tasks:

- Input into project calls in respect of local development needs (with reference to ESI Funds Strategies); and
- Assessment of applications against certain selection criteria in relation to fit with local priorities in respect of the European Regional Development Fund and European Social Fund.

The Managing Authorities and Intermediate Bodies work closely with local partners who provide:

- Practical advice and information to the Managing Authorities to assist in the preparation of local plans that contribute towards Operational Programme priorities and targets;
- Local intelligence to the Managing Authorities (or Intermediate Bodies where designated) in the development of project calls that reflect Operational Programme and local development needs as well as match funding opportunities; and
- Advice on local economic growth conditions and opportunities within the context of the Operational Programme and the local European Structural and Investment Fund Strategy to aid the Managing Authorities' (or Intermediate Bodies where designated) assessments at outline and full application stage.

This call is issued by the Department for Communities and Local Government and invites Outline Applications in respect of the European Regional Development Fund for England 2014 to 2020.

2. Call Context

On behalf of the national Growth Programme Board, the Department for Communities and Local Government (the Managing Authority) invites applications seeking European Regional Development Fund support under:

Priority Axis 4 Supporting the Shift to Low Carbon Economy in All Sectors

Investment Priorities:

- 4a** Promoting the production and distribution of energy derived from renewable resources.
- 4b** Promoting energy efficiency and renewable energy use in enterprises.
- 4c** Supporting energy efficiency, smart energy management and renewable energy use in public infrastructure, including in public buildings, and in the housing sector.
- 4e** Promoting low-carbon strategies for all types of territories, in particular for urban areas, including the promotion of sustainable multimodal urban mobility and mitigation-relevant adaptation measures.
- 4f** Promoting research and innovation in, and adoption of, low-carbon technologies.

The European Regional Development Fund Operational Programme for England 2014 to 2020 sets out how the European Regional Development Fund will focus on investment to support economic growth and job creation. **Priority Axis 4** of the Operational Programme aims to move England's economy towards a low carbon model by reducing greenhouse gas emissions, increasing the share of renewable energy and enhancing the energy efficiency of homes businesses and transport.

Any application for funding will be required to clearly demonstrate that it meets the requirement of, and makes a meaningful contribution to, the delivery of the relevant Priority Axis of the [European Regional Development Fund Operational Programme](#).

In addition, applications will be expected to meet identified local development need, as expressed in the scope of this call and as set out in the [North East Local Enterprise Partnership area](#) European Structural and Investment Funds Strategy.

Applicants are advised to familiarise themselves with the detail of the Operational Programme, local European Structural and Investment Funds Strategy and the relevant documentation listed in sections 5 through to 8 **prior to** submitting an Outline Application.

3. Scope of the Call

3.1. Scope

This call invites Outline Applications which support the delivery of **Priority Axis 4** of the European Regional Development Fund Operational Programme and responds to the local development need set out in the [North East Local Enterprise Partnership area](#) **European Structural and Investment Funds Strategy**.

<p>Indicative Fund Allocation:</p>	<p>Indicatively, through this call the Managing Authority expects to allocate up to £15-£18 million.</p> <p>The Managing Authority reserves the right to increase or decrease the indicative allocation, or support more or fewer projects subject to the volume and quality of proposals received.</p> <p>There is no indicative allocation of European Regional Development Fund funding between capital and revenue activity, both capital and revenue is eligible dependent on the nature of activities/Investment Priorities set out in the call.</p>
<p>Minimum application level</p>	<p>European Regional Development Fund investment is intended to make a significant impact on local growth. Applications are expected to demonstrate appropriate scale and impact. The Managing Authority does not intend to allocate less than £500,000 European Regional Development Fund to any single project. Consequently projects with a total value of less than £1,000,000 will not be supported under this call.</p>
<p>Duration of project approvals</p>	<p>Projects should be for a maximum of three years, however the Managing Authority reserves the right to vary the maximum duration in exceptional circumstances.</p>
<p>Geographical Scope</p>	<p>All interventions are confined to activity and beneficiaries within England.</p> <p>Projects should predominantly support businesses based within the North East Local Enterprise Partnership area.</p>
<p>Specific call requirements</p>	<p>DCLG has developed a Priority Axis 4 guidance note for applicants which will be published on the Government's European Structural Investment Fund webpages. Applicants are strongly advised to read the latest guidance in</p>

	<p>conjunction with developing their proposals, noting the following:</p> <ul style="list-style-type: none"> • Under Investment Priority 4b projects supporting SMEs need to deliver energy efficiency and not wider resource efficiency; • Under Investment Priority 4c standard retrofit activities will not be supported as part of the call; • Under Investment Priority 4f projects will need to reference how the activities proposed are consistent with the priorities in England Smart Specialisation Strategies. • Under Investment Priority 4a and 4e projects must support the delivery of a low carbon strategy which sets benchmarks against relevant local authority data as specified in the Operational Programme. <p>Low Carbon Plan</p> <p>Partners in the North East LEP area have in place a series of documents which form an initial Low Carbon Plan for the area, respondents to Investment Priorities 4a and 4e in particular will need to respond to these. Where an alternative low carbon strategy is proposed, it will need to set a bench mark against relevant local authority data in accordance with the Operational Programme.</p> <p>Further information regarding these plans can be found on the North East LEP website. Partners in the North East LEP area have also started a process to update and improve this plan at a North East LEP and North East Combined Authority level, this will take place during 2016 and will inform future calls.</p> <p>Activities providing business support should demonstrate and ensure alignment with the North East LEP Business Growth Hub.</p> <p>In considering projects received under this call the Managing Authority will take account of the outcome of the first review point on 29 January 2016 and seek advice from the local ESI Funds Sub-Committee.</p>
Call Deadlines	<p>For this specific call, applications will be assessed in batches at set review points. The review points for this call are 31 May 2016, 29 July 2016 and 30 September 2016. Any applications submitted after the 30 September 2016 will not be assessed.</p>

3.2. Local Development Need

Projects must deliver activity which directly contributes to the objectives of Priority Axis 4 of the Operational Programme, one or more of the relevant Investment Priorities and meet the **local development need** expressed in the table below.

LOCAL DEVELOPMENT NEED

Local Economic Context :

“We aspire to become Europe’s premier location for low carbon, sustainable, private-sector led growth making the most of our extensive assets and distinct strengths to drive growth which is both resilient and sustainable” With key successes in offshore wind technologies and electric vehicles, the North East has been at the forefront of the move towards low carbon economic growth. With a track-record of innovation in energy and manufacturing technologies, a strong academic base and valuable natural assets, our strategy is not only to enhance and commercialise existing strengths but also to bring the next opportunities to market and enable long-term sustainable and resilient growth.

Growing Low Carbon Sectors

We have significant and growing opportunities in low carbon technologies, processes and applications.

Our low carbon, environmental goods and services sector supports around 20,000 jobs and has underpinned significant employment growth and attracted major investment. We are particularly strong in energy, heat and transport with high proportions of the national employment in offshore wind, geothermal, hydroelectric, and biomass energy, alternative fuels, heat networks and electric vehicles present in the North East.

The low carbon economy also links strongly to our innovation base, with overlap with areas of smart specialisation in vehicle manufacture, offshore and marine technologies and data and software. We also have natural assets in our marine environment, coast and upland areas and forests as well as untapped geothermal potential.

Our strengths are not only in a strong business base but also world-class research, testing and demonstration sites. This includes part of the national Offshore Renewable Energy Catapult in Blyth, Zero Carbon Future, NOF Energy and engagement in the Energi Coast and CORE initiatives. These complement the academic strengths of our four universities with offshore wind, energy and energy storage.

Achieving Sustainable Growth

Investment in enhancing the sustainability and resilience of our businesses will support long-term competitiveness.

Although the North East represents a relatively resilient location business growth in environmental terms, investment will enable us to capitalise and protect this advantage.

Businesses in the North East have reported challenges around energy and resource efficiency and issues regarding flooding as being significant. This is supported by a Climate North East study, which estimated that without interventions there is a potential cost to the North East of England of £600m per year by 2050.

UK climate projections also indicate heat risk may be an issue towards the end of the century.

Our diverse landscape, including urban and rural dimensions, and coastal, upland and river valley areas create significant opportunities as well as some challenges. These natural sites and space available for development, provides opportunities for more sustainable and innovative solutions to support long-term sustainable development. To achieve this change and capitalise on our opportunities we will have identified key areas for activity

Further information on the North East LEP areas potential and challenges and approach to sustainability and low carbon can be found at <http://nelep.co.uk/whatwedo/publications>. This includes the full North East LEP area ESIF strategy, Smart Specialisation study and Sustainable Growth Study.

The North East LEP area includes both 'more developed' (Northumberland, Tyne and Wear) and 'transition' (County Durham) categories of region. Projects should identify delivery by category of regions and reflect relevant local context including specific delivery issues in County Durham.

Local Priorities:

Proposals should demonstrate alignment with local development need and priorities including:

- **Renewable energy generation** – the North East LEP area possess significant potential for local, small scale and community energy generation which draws on renewable sources of energy in particular projects will be supported which match with local specialism around offshore wind, geothermal and biomass as well as more widely appropriate sources such as solar and wind.
- **Energy networks and systems** – in reducing the carbon intensity of energy more integrated and intelligent systems making better use of data and smart technology are required across urban and rural areas. The majority of this activity will be supported under future Sustainable Urban Development calls as part of wider activities however schemes outside of the SUD geography (County Durham and part of Northumberland) and small scale schemes which

can plug into wider systems will be supported. Improvements which focus on heat will also be supported where appropriate.

- **Whole building/place solutions** – domestic, community and public buildings are significant energy users. Responses which address energy efficiency within a whole building/whole place context using innovative technologies and/or applications of technology will be welcomed, including holistic approaches incorporating shared processes, waste reduction, heating/cooling networks and Combined Heat and Power systems.
- **Growing the low carbon sector** – support low carbon technology start-ups and existing low carbon businesses to grow and all businesses to move into low carbon activities through business support advice, guidance and financial support. Activities should have a focus on identified key low carbon sectors including smart specialisation (offshore and marine energy, ultra-low carbon vehicles and transport and the low carbon built environment).
- **Developing low carbon supply chains** – activities to maximise the realisation of unique opportunities from the low carbon economy in the North East including renewable energy generation, building retrofit, biomass, new and innovative technologies, products and processes and energy and heating/cooling systems. This could be undertaken through targeted support and guidance, raising awareness of opportunities, and building capacity and capability, to enter supply chains relating to low carbon sectors, particularly in the key sectors.
- **Supporting research in, and development, commercialisation and roll out of, new and innovative technologies, products and processes** which reduce carbon emission and energy use especially those linked to smart specialisation areas (passenger vehicle manufacture; subsea and offshore technology; life sciences and health; and creative, digital, software and technology) and related areas of opportunity in particular around surface science (including photonics and materials), data use and energy systems. Proposals building on innovation assets, such as Catapult and other innovation centres will be particularly welcome.
- **Business Energy Efficiency** – support for aligned and tailored programmes to enhance business energy efficiency and resilience. This includes retrofitting and improvements to the business premises responding to expert advice, capacity development, building and process improvements and small-scale renewable energy generation. Delivery should demonstrate a commitment to alignment with existing projects.
- **Business Growth Hub** - projects must align with wider policy aspirations for a simpler and more aligned business service offer. Therefore proposals must

align with and complement the North East Growth Hub.

- **Future calls** – The North East LEP area has an ambitious programme around low carbon and sustainable growth which will be taken forward through a range of future calls.
- **Sustainable Urban Development** – The North East LEP area is one of a limited number of areas eligible to use Sustainable Urban Development as an approach to up to 10% of the ERDF indicative allocation. This does not represent additional resource but will draw on exiting Priority Axis indicative allocations. In the North East LEP area this represents approximately £20.6m of ERDF in the ‘more developed’ area (Northumberland, Tyne and Wear). Total investment is currently valued at over £40m for integrated approaches which draw on intelligence and use of data through systems and networks to drive sustainable growth. These approaches should holistically address the key challenges of energy, sustainable transport and healthy and longer lives. Projects which will seek to draw together these elements may consider applying through this route which is expected to be launched in 2016. Please note that Sustainable Urban Development will not be active in County Durham.

3.3. Operational Programme Investment Priorities

Applications must specify the activities to be delivered and are expected to directly contribute to **one or more** of the following Investment Priorities:

Investment Priority	4a – Promoting the production and distribution of energy derived from renewable sources.
Specific Objectives	Increase the number of small scale renewable energy schemes in England.
Indicative Actions	<p>Projects will support micro-energy installations, off-grid energy productions, renewable heat networks and ground and air source heat pumps:</p> <p>The type of measures that might be implemented with support from European Regional Development Fund.</p> <p>Under this investment priority, indicative actions to be supported by European Regional Development Fund may</p>

	<p>include:</p> <ul style="list-style-type: none"> • Measures to support increased production of renewable fuels and energy, in particular wind energy, solar and biomass • Support to build capability and capacity for supply chains in renewable energy • Demonstration and deployment of renewable energy technologies • Measures to support the wider deployment of renewable heat, including micro-generation, geothermal, renewable heat networks or district heating, ground source and air source heat pumps, and biomass systems with associated heat off-take and heat distribution networks along with recycling processing reprocessing and remanufacturing facilities, and • Anaerobic digestion plants and other biomass or landfill gas schemes.
--	---

Investment Priority	4b – Promoting energy efficiency and renewable energy in enterprises.
Specific Objectives	Increase energy efficiency in particular in Small and Medium sized Enterprises, including through the implementation of low carbon technologies.
Indicative Actions	<p>The main target group is Small and Medium Sized Enterprises.</p> <p>Under this investment priority indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Enhanced advice, support, information and action to promote innovation in businesses and how they operate, in order to deliver best practice in energy management. This will include innovation in energy

	<p>efficiency and energy cost reduction to improve businesses' competitiveness and resilience</p> <ul style="list-style-type: none"> • Support to businesses to undertake 'green' diagnostics or audits of energy efficiency and potential for renewable generation and energy use, which will be followed by provision of energy efficiency information and guidance, tailored energy action plans and of support to implement them • Investing in energy efficiency measures, processes and renewable generation capacity to improve a business' or building's environmental performance or its resilience to the impacts of climate change • Investing in measures to stimulate cost-effective deep renovations of buildings, including staged deep renovations • Supporting an increase in energy efficiency in enterprises including an emphasis on 'whole place' especially through improving industrial processes, designing out waste, recovery of 'waste' heat energy and combined heat and power • Supporting increased Small and Medium Sized Enterprises access to national and local government procured contracts for energy efficient goods and services • Developing low carbon innovation in relation to energy efficiency within enterprises, including through technologies and engagement practices • Building retrofit and energy efficiency measures, especially whole building solutions to exemplify, and support the commercialisation of, next phase technologies which are near to market and low carbon construction techniques to improve the energy efficiency of buildings.
--	---

Investment Priority	4c – Supporting energy efficiency, smart energy management and renewable energy use in public infrastructure, including in public buildings, and in the housing sector.
Specific Objectives	Increase the energy efficiency of homes and public buildings, including through the implementation of low carbon technologies.
Indicative Actions	<p>Under this investment priority indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Provision of advice and support to increase the use and take up of low carbon technologies, energy efficiency measures, renewable energy technologies and smart energy systems in housing stock and public buildings • Supporting low carbon innovation in relation to the integrated ‘whole place’ energy management approach including energy waste and re-use • Investing in building retrofit, energy efficiency measures, renewable and smart energy systems deployment, especially whole building or place solutions exemplifying next phase technologies which are near to market • Investing in domestic energy efficiency, renewable energy and smart construction techniques • Investment in the development and wider use of Energy Performance Contracting in the public buildings and housing sectors.

Investment Priority	4e – Promoting low-carbon strategies for all types of territories, in particular for urban areas, including the promotion of sustainable multimodal urban mobility and mitigation-relevant adaptation measures.
Specific	Increase implementation of whole place low carbon

Objectives	solutions and decentralised energy measures.
Indicative Actions	<p>Activity under this investment priority will be complementary to, and work alongside, activity under investment priority 4(a). Activity under this investment priority is based on a holistic approach to the reduction of greenhouse gas emissions, ensuring that actions are integrated within the framework of an overarching strategy or strategies.</p> <p>In order to promote such strategies, examples of actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • investments in local/regional smart grid demonstration projects, including validation and solving system integration issues • sustainable energy action plans for urban areas, including public lighting systems, smart metering and distribution through smart grids • Investments in combined heat and power from renewable sources • Investments to encourage the adoption of renewable technologies. <p>A strategic approach is particularly important in the area of low carbon transport, whether for sustainable urban mobility, or improving links between urban and rural areas, or connecting dispersed rural communities. Examples of actions include:</p> <ul style="list-style-type: none"> • investments in actions aimed at improving the capacity at local level to develop and implement integrated and sustainable transport strategies and plans (including for example actions related to modelling data collection, integrated transport management, operations and services, public consultation etc) to reduce transport related air pollution, in particular retrofit or replacement programmes for bus fleets, incentive schemes for cleaner transport, improved public transport infrastructure and alternative forms of transport • investments in actions aimed at introducing innovative environmentally-friendly and low-carbon technologies (for example, alternative fuel stations or charging points) • investments in actions aimed at developing innovative and multi-modal transport services (for example,

	<p>intelligent transport systems for travel information and planning, traffic and demand management, smart ticketing, multimodal integrated datasets or cooperative systems)</p> <ul style="list-style-type: none"> • innovative transport pricing and user charging systems • cycle paths, walkways and waterways only where part of an integrated approach to greenhouse gas reductions.
--	--

Investment Priority	4f – Promoting research and innovation in, and adoption of, low-carbon technologies.
Specific Objectives	Increase innovation in, and adoption of, low carbon technologies.
Indicative Actions	<p>Under this investment priority indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Research and Development, innovation and supply chain work for low carbon technologies and materials, including, wave and wind energy, smart grids, distributed generation, solar and photovoltaics, heat networks, heat pumps and low carbon heat for energy intensive industries • Research underpinning carbon capture and storage, taking account of the restrictions laid down in Article 3.3.b of the European Regional Development Fund • Technology centres of excellence and test facilities, including relevant Catapult centres • Renewable technologies in the United Kingdom renewable energy roadmap • Research, development, demonstration and adoption of technologies and systems that support low-energy transport and accelerate the establishment of new technologies such as low emissions vehicles (electric, hybrid and hydrogen) • Knowledge transfer with Higher Education/Further Education institutions and Businesses • Supporting low carbon tech start-ups and greater commercialisation of low carbon products and

	<p>processes</p> <ul style="list-style-type: none"> • Developing financing methods that encourage the adoption of proven low carbon technologies and generate long-term financial savings • Demonstration and deployment of decentralised renewable energy technologies • Research, development and innovation and supply chain development for low carbon and resource efficient technologies and materials (including small scale pilot programmes that test the market with new low carbon solutions and the use of secondary materials).
--	---

4. Required Outputs under this Call

Projects must deliver against the Priority Axis 4 outputs of the European Regional Development Fund 2014 to 2020 Operational Programme. For projects coming forward under this call the expected outputs and results are:

ID	Output Indicator
C1	Number of enterprises receiving support
C5	Number of new enterprises supported
C26	Number of enterprises cooperating with research institutions
C29	Number of enterprises supported to introduce new to the firm products
C30	Additional capacity of renewable energy production
C31	Number of households with improved energy consumption
C32	Decrease of annual primary energy consumption of public buildings
C34	Estimated greenhouse gas reductions

Applicants will need to demonstrate how the eligible activity, funded by the European Regional Development Fund, will achieve the outputs committed to within the proposal. The application should clearly state the methodology used to determine the levels of outputs proposed.

All operations will be required to report regularly on progress toward achievement of targets. This will need to include both quantitative and qualitative data relevant to the appropriate geographical areas. Applicants will need to explain how they will collect and record this information to maintain a fully evidenced audit trail. It should be noted that if an operation fails to deliver contracted outputs, a performance penalty may apply.

5. Application Process & Prioritisation Methodology

There are two stages to the European Regional Development Fund application process;

- (i) Outline Application and, if successful
- (ii) Full Application.

Acceptance of an Outline Application to progress to full application stage does not in any way indicate or constitute an offer of European Regional Development Fund grant.

Applicants must fully complete the [Outline Application](#) which will be assessed by the Managing Authority against all of the national [Selection Criteria](#) expect where an Intermediate Body has been designated to assess against some of the selection criteria. Where an Intermediate Body has been designated to undertake delegated tasks, the Intermediate Body will undertake the assessment against those selection criteria in relation to fit with local priorities.

Outline Applications will be assessed in two stages, Gateway assessment and Core assessment.

The Gateway assessment is undertaken by the Managing Authorities and considers:

- applicant eligibility;
- activity and expenditure eligibility; and
- fit with the National Operational Programme and the local development need set out in section 2.

Applications that fail the Gateway assessment undertaken by the Managing Authority will be rejected. Applications which pass the Gateway assessment will then be assessed by the Managing Authority in relation to all Core assessment criteria.

In areas where an Intermediate Body has been designated, the following will apply:

The Intermediate Body will assess the application against the following Core assessment criteria:

- Local Strategic Fit

The Managing Authority will assess the application against the following Core assessment criteria:

- National Strategic Fit
- Value for money
- Management and control
- Deliverability
- Compliance
 - Procurement
 - State Aid
 - Publicity requirements
- Cross cutting themes
 - Environmental sustainability
 - Equal Opportunities

The Intermediate Body will also provide advice to the Managing Authority to assist the Managing Authority to make its assessment against the following Core selection criteria:

- Value for money
- Deliverability

Having assessed projects against these criteria the relevant Local Economic Partnership area European Structural and Investment Fund Sub-Committee will advise the Managing Authority or Intermediate Body as relevant on the contribution to local economic growth conditions and opportunities within the context of the Operational Programme and local European Structural and Investment Fund Strategy to aid the Managing Authority's assessments (at outline and full application stage).

Having concluded their assessments the Managing Authority and the Intermediate Body will prioritise the applications they wish to proceed based on their assessment against their respective selection criteria. Only projects that the Managing Authority and the Intermediate Body each agree should proceed, based on their respective core selection criteria, will be invited to submit a full application. Subsequently only those full applications that the Managing Authority and the Intermediate Body each agree should proceed, based on their respective selection criteria, will be approved.

Please note that the Managing Authority's decision is final and there are no appeals. If you wish to complain about the calls and application process, please follow the procedure set out at <https://www.gov.uk/government/organisations/department-for-communities-and-local-government/about/complaints-procedure>

6. General Information

6.1. National Eligibility Rules

When developing an application, Applicants must refer to the [National Eligibility Rules](#) setting out the requirements of the 2014-2020 European Regional Development Fund Programme. It is the responsibility of the Applicant to ensure that the Rules are adhered to both at application stage and following approval. Failure to do so can lead to financial penalties leading to recovery of up to 100% of grant. Applicants are strongly advised to seek specialist advice if in doubt on any requirement.

European Regional Development Fund eligibility rules apply to **all** project spend within the eligible costs, including match funding.

The European Regional Development Fund is governed by European regulations and national rules. Applicants are advised to familiarise themselves with the relevant documentation, (Section 8 Key Document refers) prior to submitting an Outline Application. If successful, Applicants will enter into a Funding Agreement and must abide by the standard terms and conditions contained therein. Applicants are therefore strongly advised to read these terms and conditions to ensure that they are able to enter into such an agreement prior to responding to the call. Once a Funding Agreement has been issued it should be signed and returned within 30 days, unless otherwise agreed with the Managing Authority.

6.2. Eligible Applicants

Section 4 of the [National Eligibility Rules](#) sets out who is eligible to apply.

Applicants must be legally constituted at the point of signing a Funding Agreement. If the application is approved the Applicant organisation will enter into a legally binding Funding Agreement and therefore will carry the liability for ensuring that the terms and conditions of the Funding Agreement are met.

If there is more than one organisation applying for the funds, a lead organisation must be selected to become the Applicant with the remaining organisation(s) acting as Delivery Partner(s). In this situation the Applicant would be responsible and liable for the Delivery Partner(s) and ensuring the project is operating compliantly.

During the application process the Managing Authority will consider the Applicant's track record, both positive and negative. If the Applicant has been involved in the delivery of previous European grants and any irregularities have been identified, the Managing Authority will expect to see how and what steps have been taken to

ensure that the risk of further irregularities in the future is mitigated. It is acknowledged that some organisations will be new to European Structural and Investment Funds funding and will not have a track record.

6.3. Contribution Rate & Match Funding

European Regional Development Fund is normally expected to intervene where no other funding can be obtained (i.e. the funder of last resort). The level of European Regional Development Fund awarded will be the minimum in order for the project to proceed.

The maximum Contribution Rate is 50% within the More developed area (Northumberland and Tyne and Wear) and 60% within the Transition area (County Durham) of the total eligible project costs subject to State Aid regulations.

The remaining 50% for the More developed area and 40% for the Transition area or more must come from other eligible sources as specified under section 6 of the National Eligibility Rules. Applicants will need to demonstrate that they have eligible match funding in place for the balance of costs. Other European Union funds cannot be used as a source of match funding.

European Regional Development Fund investment is limited by State Aid regulations and where the award of European Regional Development Fund would constitute State Aid the European Regional Development Fund grant rate may fall below the 50% in the More developed area and 60% in the Transition maximum.

European Regional Development Fund is paid quarterly in arrears and expenditure must be defrayed prior to the submission of any Grant claims. Applicants may be asked to demonstrate how they are able to cash flow the operation.

6.4. Project Timescales

European Regional Development Fund funding will normally be approved for three years, however the Managing Authority reserves the right to extend the contract term in exceptional circumstances.

Projects approved through this call are expected to:

- Submit a detailed and complete full application within three months of formal selection at outline stage. Projects which fail to meet this deadline may be deselected,
- Commence delivery (defraying European Regional Development Fund eligible costs) within three months of formal approval. Projects which fail to meet this deadline may be deselected, and
- Be completed by June 2023.

6.5. Capital Projects

Applicants seeking European Regional Development Fund to support a capital project (i.e. land and/or property) will need to meet Building Research Establishment Environmental Assessment Method or Civil Engineering Environmental Quality Assessment 'Excellent' for new builds and 'Very Good' for refurbishments.

Applicants will need to provide evidence of how they will achieve the rating required (unless otherwise agreed with the Managing Authority).

Applicants will need to demonstrate that they have the rights and permissions to undertake the project and must provide:

- Proof of current interest in the land and/or property, which includes evidence of the freehold ownership or any lease arrangements that may be in place; and
- Evidence of the approval of any planning permission, or in certain circumstances a clear statement on the process for securing such consents and any risks to the project.

Royal Institute of British Architects Stage D costs must be supplied with the Full Application and be certified by an independent Quantity Surveyor and Land/Property contributions certified by a Real Estate Valuation expert who are current and chartered members of the Royal Institute of Chartered Surveyors/ Chartered Institute of Builders or equivalent body.

Successful Applicants will be required to provide security to the Managing Authority in the form of a Legal Charge and/or Deed of Covenant over the land and/or property. Applicants will be responsible for registering the charge at their own cost.

6.6. Cross Cutting Themes/Horizontal Principles

All applications received under this call should demonstrate how the Cross Cutting Themes have been addressed in the project design and development. Cross Cutting Themes for European Regional Development Fund are 'equality and anti-discrimination' and 'sustainable development'. Further information is available in the [European Regional Development Fund Operational Programme](#).

6.7. Additionality, Duplication and Displacement

Additionality is a core principle of European Regional Development Funding.

Applicants must be able to demonstrate that the activity paid for out of European Regional Development Funding adds value to new or existing activity. Projects need to demonstrate that without the support of European Regional Development Funding the activity would not have taken place.

European Regional Development Funding cannot support activities that duplicate existing provision/services within the region.

Applications need to identify and evidence how the beneficiaries will use the service and demonstrate that the project does not displace other activity available in the market place.

6.8. State Aid & Revenue Generation

Applicants are required, in the Outline Application, to provide a view on how their proposal complies with State Aid law. Applicants must ensure that projects comply with the law on State Aid.¹ Grant funding to any economic undertaking which is State Aid can only be awarded if it is compatible aid, in that it complies with the terms of a notified scheme or is covered by the De Minimis Regulation. Guidance for Grant Recipients, explaining more about [State Aid](#), is available; it is important that Applicants take responsibility for understanding the importance of the State Aid rules and securing their full compliance with them throughout the project, if it is selected into the Programme.

The Managing Authority is not able to give legal advice on State Aid. It is the responsibility of the Applicant to ensure that the operation is State Aid compliant.

Where the Applicant does not perceive that there is any State Aid, it should state whether or not it considers Articles 61 and 65(8) of regulation 1303/2013 to apply. Article 61 refers to monitoring revenues generated after completion of the project, and Article 65(8) how to deal with differences in the forecast and actual revenues at the end of the operation. This revenue should be taken into account in calculating eligible expenditure. The details of this will be tested at the full application stage.

6.9. Funding Agreement

The Funding Agreement is a standard, non-negotiable and legally binding document. Any successful Applicant will be subject to the terms and conditions contained within this agreement. Applicants are strongly advised to seek relevant advice to ensure that they would be able to enter into and abide by the terms of the Funding Agreement.

Applicants are advised that additional provisions and securities may be included within the Funding Agreement to protect the investment. Detailed advice will be given if appropriate at the Full Application stage.

¹ Article 107(1) of the Treaty on the Functioning of the European Union provides that: "Save as otherwise provided in the Treaties, any aid granted by a Member State or through state resources in any form whatsoever which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between Member States, be incompatible with the internal market."

Failure to meet any of the conditions of the Funding Agreement or the commitments within the application will result in claw back of the Grant (which may include interest).

6.10. Procurement

All costs claimed by the Applicant (Grant Recipient and/or Delivery Partner(s)) must be recovered on an actual cost basis. Other costs must be procured in line with National (including [Public Procurement Regulation 2015](#)) and European Union regulations. Procurement will be subject to audit and verification and any irregularity will result in financial penalty of up to 100% of the grant paid. Robust and transparent procurement is required to ensure that Grant Recipients:

- Consider value for money;
- Maximise efficient use of public money; and
- Maintain competitiveness and fairness across the European Union.

It is **strongly recommended** that Applicants seek and follow legal advice in respect of procurement requirements. Procurement irregularities remain the most substantive cause of error and clawback of grant.

7. Support

Please note that this is a competitive call and to preserve impartiality the Managing Authority and, where appropriate, the Intermediate Body are unable to enter into correspondence with applicants over their Outline Application. Details of where guidance can be found are contained throughout this call document. In exceptional circumstances, if there are issues with accessing this guidance, please contact: NE.ERDFENQUIRIES@communities.gsi.gov.uk.

8. Key Documents

- European Regional Development Fund Operational Programme;
- Outline Application Form;
- Outline Application Form Guidance;
- Local Enterprise Partnership area's European Structural and Investment Funds Strategy;

- Eligibility Guidance;
- Target Definitions; and
- Funding Agreement (Revenue and/or Capital).

9. Document Checklist

Incomplete applications will be rejected. Please ensure the following information (documents) are submitted.

Outline Stage:

- Fully completed Outline Application;
- Financial Tables; and
- Outputs, Results and Indicators Tables.

10. Document Submission

Completed Outline Applications must be submitted via **email** to the address in Section 7.

Outline Applications submitted prior to the first review point of 31 May 2016 will be assessed and progressed at that point. Those submitted between 1 June 2016 and 29 July 2016 will be assessed and progressed at that point. Outline Applications submitted between the 30 July 2016 and the closing date on 30 September 2016 will be assessed and progressed at that point, subject to the response to the first and second review points. The call will close for applications on 30 September 2016. However, the Department reserves the right to close the call early depending on the level of response at the first review point. Outline Application forms not received by the deadline will not be assessed. Outline Applications which are not fully completed will be excluded.

For this call applications will normally be required to **commence delivery/activity within three months** of the award of Funding Agreement.

Any changes related to the deadline for the submission of the Outline Application form will be notified on the [European Growth Funding](#) website pages.
